

2019 Oklahoma-Texas Pollinator Survey

Thank you for participating in this pollinator citizen science study. Select a 2 ft x 2 ft area that has flowers in bloom and count all pollinators within 60 seconds. Pollinator types are broken down into several categories (i.e. LGB, MSB, SBB, etc.) and we ask that you familiarize yourself with these groups before conducting the survey. Each row in the bottom table represents a separate/different 2 ft. x 2 ft. area observed for 60 seconds. Print a new copy of this document for each day you conduct observations.

Name: _____ # of Observers: _____

Location (address or GPS coordinates): _____ Date: _____ (mm/dd/yyyy)

#	Time	Temp (F)	Plant species (Genus species)	Plant Cultivar (if known)	Bloom (0-3)	Flower Color R O Y G B P W	Bee & Wasp Counts					Other Insect Counts	
							LGB	MB	SBB	SGB	NBEE	HVR	BUT

Blm: 0-3, 0 = Less than 25% of plant in bloom, 1 = Between 25% and 50%, 2 = Between 51% and 75%, 3 = Above 76%.

Col: R (red), O (orange), Y (yellow), G (green), B (blue/cyan), P (purple, indigo, and violet), W (white, pink)

Bees & Wasps: LGB (Large bees, bumblebees), MB (Medium bees, honeybees), SBB (Small black bees), SGB (Small green bees), NBEE (Non-bee, wasps), HVR (Hoverflies, bee-like flies), BUT (butterflies, moths)
